Outline of Graduate School of Rehabilitation Science

This graduate school aims to realize new rehabilitation that is more closely related to daily life, supporting independent social participation in the community, beyond the boundaries of conventional rehabilitation medicine such as the treatment, recovery and prevention of progression of disabilities. Comprising the two departments of Physical Therapy and Occupational Therapy, our Graduate School of Rehabilitation Science seeks to cultivate human resources who possess advanced research capabilities, with the goal of establishing new rehabilitation studies covering all stages from health maintenance/promotion, illness and disability prevention, to treatment, recovery, and social rehabilitation/participation.

In this graduate school, multiple faculty members will provide academic guidance according to the research purpose, abilities and aptitudes of the students, and the faculty members will cooperate to provide research guidance under a collective guidance system. If you would like to apply to our graduate school, before undergoing the application, you should consult with the faculty member under whom you wish to study regarding your research after admission.

1) Department of Physical Therapy

The Department of Physical Therapy undertakes a broad range of basic to clinical research, including motor control, neurophysiology, musculoskeletal physical therapy, cardiopulmonary physical therapy, support for sports for the disabled, geriatric rehabilitation, women's health, and preventive physical therapy.

Areas of concentration in this departments are Neuroanatomy, Motor Control, Motor Function Development, Motor Function Recovery, Functioning in Older Adults, Health Promotion, and Social Participation Support.

2) Department of Occupational Therapy

The Department of Occupational Therapy undertakes a wide range of basic to clinical research to support daily living, which include higher brain function, post-apoplectic upper limb function, remote rehabilitation, severe dementia, developmental disorder, intractable diseases, cancer, cognitive decline prevention for the elderly, and occupational science.

Areas of concentration in this department are Cognitive / Conduct Disorders, Mental / Behavioral Disorders, Developmental Period Functioning, Motor Function / Motor Recovery, and Nursing Care Prevention Technology.

Master's Program

Graduate School of Rehabilitation Science Master's Program Admissions Policy

Our master's program in the Department of Rehabilitation Science selects students with the following qualities, abilities and motivations, based on our principle of training highly qualified medical professionals who contribute to improving people's health and quality of life, and valuing the preciousness of life and human dignity:

1. Those with knowledge and high ethical values in rehabilitation science, from prevention and treatment of illnesses to alleviation of disabilities or support for children/adults with disabilities or the elderly to facilitate their independent living and social participation in communities
2. Those who have motivations for research and concrete prospects, and presentation skills to convey them accurately
3. Those who have English skills to read and understand specialized knowledge and express logical thinking

[10] Others

1. Handling of Personal Data

In compliance with legislation on the protection of personal data and regulations on the handling and custody of personal data within the University Public Corporation of Osaka, Osaka Metropolitan University aims to minimize data collection. We use and store any data we collect appropriately in accordance with the relevant laws and regulations, etc.

(1) Definition of personal data

Personal data comprise names, addresses, telephone numbers, examination numbers, email addresses, dates of birth, results, health information (collected for the purpose of support provision), and other information that could allow an individual to be identified (including items that do not facilitate individual identification on their own but can be easily matched with other information thereby allowing an individual to be conclusively identified).

(2) Use of personal data

- Personal data such as examination results, which are necessary to screen applicants for

admission, are utilized in the applicant screening process and enrollment procedure. They are also used in research and surveys related to improving the efficacy of the entrance examination. Examples are follow-up surveys, analyses and surveys of applicant trends, tasks related to supporting students during their tenure at the University (regarding, for example, scholarships and tuition fees, student counselling, and health management), FD※1 activities including those aimed at improving the quality of education provided, and IR※2 activities including those aimed at improving the running of the University. (For those who provide information while enrolling, the disclosed data may also be analyzed in combination with personal data collected after enrollment.)

- The University uses personal data for academic research. However, research outcomes are not published in a form that allows individuals to be identified.
- The University may outsource the computerization, processing, and analysis of data to third parties, as well as the production of statistics and printing and binding. When the University supplies all or some personal data to a business for outsourcing, the business in question is contractually obligated to follow protection and storage stipulations that conform with legislation on personal data protection.

※1 FD means faculty development, which refers to the systematic efforts of faculty to improve and enhance teaching content and methods.

For example: Teaching method workshops and training sessions for newly appointed teaching staff

※2 IR means institutional research. In this context, it refers to the University's collection and analysis of internal data to improve institutional management, provide the highest quality student support and education, and inform the planning, implementation, and testing of other improvement measures.

2. Providing Information on Individual Results

Information on individual results will be provided as follows.

(1) Period

First screening November 5, 2026 10:00 - November 27, 2026 15:00

Second screening May 7, 2027 10:00 - June 4, 2027 15:00

(2) Eligible Persons

Only the examinees themselves.

(3) How the information is provided

Please check your results by logging in to the portal using the URL below.

https://www.omu.ac.jp/admissions/g/exam_info/score/

3. In the event that the entrance examination cannot be conducted as planned due to a natural disaster, etc., an “Emergency

Notice” will be published on the university's website, so be sure to check it.

<https://www.omu.ac.jp/admissions/g/news/>

4. If any false information is found in the Application documents, or if the applicant is found to

have committed any misconduct on the entrance examination, the admission approval may be revoked even after the enrollment procedure has been completed.

5. If a student who has applied and completed the admission procedures with the expectation of graduating or receiving a degree fails to graduate or receive a degree by March 31, 2027, admission will be cancelled.
6. The second semester starts from September 24, and the classes are open for those admitted in October 1.
7. Osaka Metropolitan University (OMU) stipulates the regulations for security export control in accordance with the Foreign Exchange and Foreign Trade Act, and strictly reviews all items and technologies to be exported from the university. If you have conflict of interest with any regulations set by OMU, you may not be eligible for education and research of OMU. Please note that you may be asked to submit documents as necessary.

[10] Others

1. Handling of Personal Data

In compliance with legislation on the protection of personal data and regulations on the handling and custody of personal data within the University Public Corporation of Osaka, Osaka Metropolitan University aims to minimize data collection. We use and store any data we collect appropriately in accordance with the relevant laws and regulations, etc.

(1) Definition of personal data

Personal data comprise names, addresses, telephone numbers, examination numbers, email addresses, dates of birth, results, health information (collected for the purpose of support provision), and other information that could allow an individual to be identified (including items that do not facilitate individual identification on their own but can be easily matched with other information thereby allowing an individual to be conclusively identified).

(2) Use of personal data

- Personal data such as examination results, which are necessary to screen applicants for admission, are utilized in the applicant screening process and enrollment procedure. They are also used in research and surveys related to improving the efficacy of the entrance examination. Examples are follow-up surveys, analyses and surveys of applicant trends, tasks related to supporting students during their tenure at the University (regarding, for example, scholarships and tuition fees, student counselling, and health management), FD※1 activities including those aimed at improving the quality of education provided, and IR※2 activities including those aimed at improving the running of the University. (For those who provide information while enrolling, the disclosed data may also be analyzed in combination with personal data collected after enrollment.)

- The University uses personal data for academic research. However, research outcomes are not published in a form that allows individuals to be identified.
- The University may outsource the computerization, processing, and analysis of data to third parties, as well as the production of statistics and printing and binding. When the University supplies all or some personal data to a business for outsourcing, the business in question is contractually obligated to follow protection and storage stipulations that conform with legislation on personal data protection.

※1 FD means faculty development, which refers to the systematic efforts of faculty to improve and enhance teaching content and methods.

For example: Teaching method workshops and training sessions for newly appointed teaching staff

※2 IR means institutional research. In this context, it refers to the University's collection and analysis of internal data to improve institutional management, provide the highest quality student support and education, and inform the planning, implementation, and testing of other improvement measures.

2. Providing Information on Individual Results

Information on individual results will be provided as follows.

(1) Period

First screening November 5, 2026 10:00 - November 27, 2026 15:00

Second screening May 7, 2027 10:00 - June 4, 2027 15:00

(2) Eligible Persons

Only the examinees themselves.

(3) How the information is provided

Please check your results by logging in to the portal using the URL below.

https://www.omu.ac.jp/admissions/g/exam_info/score/

3. In the event that the entrance examination cannot be conducted as planned due to a natural disaster, etc., an “Emergency

Notice” will be published on the university's website, so be sure to check it.
