

## 研究業績リスト

### 出版論文

1. M. Sakuma, *The homology groups of abelian coverings of links*, Math. Sem. Notes, Kobe Univ. **7** (1979) 515–530.
2. M. Sakuma, *Surface bundles over  $S^1$  which are 2-fold branched cyclic coverings of  $S^3$* , Math. Sem. Notes, Kobe Univ., **9** (1981) 159–180.
3. M. Sakuma, *On the polynomials of periodic links*, Math. Ann. **257** (1981) 487–494.
4. M. Sakuma, *Periods of composite links*, Math. Sem. Notes, Kobe Univ. **9** (1981) 445–452.
5. M. Sakuma, *On regular coverings of links*, Math. Ann. **260** (1982) 303–315.
6. L. Traldi and M. Sakuma, *Linking numbers and the groups of links*, Math. Sem. Notes, Kobe Univ. **11** (1983) 3–16.
7. S. Furusawa and M. Sakuma *Dehn surgery on symmetric knots*, Math. Sem. Notes, Kobe Univ. **11** (1983) 179–198.
8. A. Kawauchi, T. Kobayashi and M. Sakuma *On 3-manifolds with no periodic maps*, Japanese J. Math. **10** (1984) 185–193.
9. F. Hosokawa, A. Kawauchi, Y. Nakanishi and M. Sakuma *Note on critical points of surfaces in 4-space*, Kobe J. Math. **1** (1984) 151–152.
10. M. Sakuma, *Involutions on torus bundles over  $S^1$* , Osaka J. Math. **22** (1985) 163–185,
11. M. Sakuma, *On strongly invertible knots*, Algebraic and Topological Theories, Proc. Miyata memorial Conf. (1985) Kinokuniya Co. Ltd.
12. M. Sakuma, *Non-free-periodicity of amphicheiral hyperbolic knots*, Homotopy Theory and related topics Adv. Stud. in Math. **9** (1986) Kinokuniya and North-Holland.
13. M. Sakuma, *Uniqueness of symmetries of knots*, Math. Z. **192** (1986) 225–242.
14. M. Sakuma, *An evaluation of the Jones polynomial of a parallel link*, Math. Proc. Cambridge Phil. Soc. **104** (1988) 105–113.
15. M. Sakuma, *Realization of the symmetry groups of links*, Transformation groups (ed. K. Kawakubo) Lect. Notes in Math. **1375** (1989) 291–306 Springer-Verlag.
16. M. Masuda and M. Sakuma *Knotting codimension 2 submanifolds locally*, L'Enseign. Math. **35** (1989) 21–40.
17. M. Sakuma, *The geometries of spherical Montesinos links*, Kobe J. Math. **7** (1990) 167–190.
18. K. Morimoto and M. Sakuma, *On unknotting tunnels for knots*, Math. Ann. **289** (1991) 143–167.
19. M. Sakuma, *A note on Wada's group invariants of links*, Proc. Japan Academy **67** (1991) 176–177.

20. K. Kodama and M. Sakuma, *Symmetry groups of prime knots up to 10 crossings*, Knot 90 (ed. A. Kawauchi) 324–340 (1992) Walter de Gruyter Co.
21. M. Sakuma, *Minimal genus Seifert surfaces for special arborescent links*, Osaka J. Math. **31** (1994) 861–905.
22. M. Sakuma, *Homology of abelian coverings and spatial graphs*, Canadian J. Math. **47** (1995) 201–224.
23. M. Sakuma and J. Weeks, *The generalized tilt formula*, Geometriae Dedicata **55** (1995) 115–123.
24. M. Sakuma and J. Weeks, *Examples of canonical decompositions of hyperbolic link complements*, Japanese J. Math. 21 (1995) 393–439.
25. K. Morimoto, M. Sakuma and Y. Yokota, *Examples of tunnel number one knots which have the property “ $1+1=3$ ”*, Math. Proc. Cambridge Phil. Soc. **119** (1996) 113–118.
26. K. Morimoto, M. Sakuma and Y. Yokota, *Identifying tunnel number one knots*, J. Math. Soc., Japan **48** (1996) 667–688.
27. M. Hirasawa and M. Sakuma, *Minimal genus Seifert surfaces for alternating links*, Knot 96 (ed. S. Suzuki) 383–394 (1997) World Scientific Publishing Co.
28. H. Akiyoshi, Y. Nakagawa and M. Sakuma, *Shortest vertical geodesics of manifolds obtained by hyperbolic Dehn surgery on the Whitehead link*, Knot 96 (ed. S. Suzuki) 433–448 (1997) World Scientific Publishing Co.
29. J. Hillman and M. Sakuma, *Homology of finite abelian coverings*, Canadian Math. Bull. **40** (1997) 309–315.
30. M. Sakuma, *Murasugi decompositions of certain Seifert surfaces and unknotting operations*, Proc. of the 5th Korea-Japan School of knots and links (ed. G.T. Jin and K.H. Ko) 233–248.
31. M. Sakuma, *The topology, geometry and algebra of unknotting tunnels*, Chaos, Solitons and Fractals **9** (1998), 739–748
32. E. Klimenko and M. Sakuma, *Two-generator discrete subgroups of  $Isom(H^2)$  containing orientation-reversing elements*, Geom. Dedicata, **72** (1998), 247–282.
33. H. Akiyoshi, M. Sakuma, M. Wada, and Y. Yamshita, *A way from punctured torus groups to two-bridge knot groups*, Proceeding of Workshop in Pure Mathematics **19** (2000), 145–173.
34. M. Sakuma, *Surgery description of orientation-preserving periodic maps on compact orientable 3-manifolds*, Rend. Istit. Mat. Univ. Trieste **32** (2001), suppl. 1, 375–396.
35. H. Akiyoshi and M. Sakuma, *Comparing two convex hull constructions of cusped hyperbolic manifolds*, Proceedings of the Workshop “Kleinian groups and hyperbolic 3-manifolds”, held in Warwick, 2002, London Math. Soc., Lecture Note Series **299**, 209–246, 2003.
36. H. Akiyoshi, M. Sakuma, M. Wada, and Y. Yamshita, *Jorgensen’s picture of punctured torus groups and its refinement*, Proceedings of the Workshop “Kleinian groups and hyperbolic 3-manifolds”, held in Warwick, 2002, London Math. Soc., Lecture Note Series **299**, 247–273, 2003.

37. H. Akiyoshi, H. Miyachi and M. Sakuma, *A refinement of McShane's identity for quasifuchsian punctured torus groups*, In the Tradition of Ahlfors and Bers, III, Contemporary Math., **355**, 21–40, 2004.
38. H. Akiyoshi, H. Miyachi and M. Sakuma, *Variations of McShane's identity for punctured surface groups*, Proceedings of the Workshop “Spaces of Kleinian groups and hyperbolic 3-manifolds”, London Math. Soc., Lecture Note Series **329**, 151–185, 2006.
39. M. Sakuma, *Epimorphisms between 2-bridge knot groups from the view point of markoff maps*, Intelligence of Low Dimensional Topology 2006 Eds. J. Scott Carter et. al. pp. 279–286, (2007) World Scientific Publishing Co.
40. T. Ohtsuki, R. Riley and M. Sakuma, *Epimorphisms between 2-bridge knot groups*, The Zieschang Gedenkschrift, Geometry and Topology Monograph **14**, 2008, pp.417–450.
