加藤 信

- [1] Symmetric solutions of the equation for the scalar curvature under conformal deformation of a Riemannian metric, Kato, Shin, *J. Math. Soc. Japan* 43 (1991), no. 4, 733–750.
- [2] Conformal deformation to prescribed scalar curvature on complete noncompact Riemannian manifolds with nonpositive curvature, Kato, Shin, *Tohoku Math. J. (2)* 45 (1993), no. 2, 205–230.
- [3] Complete conformal metrics with prescribed scalar curvature on subdomains of a compact manifold, Kato, Shin; Nayatani, Shin, *Nagoya Math. J.* 132 (1993), 155–173.
- [4] Examples of non-Einstein Yamabe metrics with positive scalar curvature, Kato, Shin, *Tokyo J. Math.* 17 (1994), no. 1, 187–189.
- [5] Maximal solutions of the scalar curvature equation on open Riemannian manifolds, Kato, Shin, *Osaka J. Math.* 31 (1994), no. 2, 355–371. [Correction : *Osaka J. Math.* 33 (1996), no. 2, 587–588.]
- [6] Construction of  $n$ -end catenoids with prescribed flux, Kato, Shin, *Kodai Math. J.* 18 (1995), no. 1, 86–98.
- [7] Structure theorems of the scalar curvature equation on subdomains of a compact Riemannian manifold, Kato, Shin, *Tsukuba J. Math.* 21 (1997), no. 1, 153–168.
- [8] An inverse problem of the flux for minimal surfaces, Kato, Shin; Umehara, Masaaki; Yamada, Kotaro, *Indiana Univ. Math. J.* 46 (1997), no. 2, 529–559.
- [9] An inverse problem of the flux formula, Kato, Shin; Umehara, Masaaki; Yamada, Kotaro, Giachoudis-Giapoulis, Thessaloniki; available from , 1997, 228–233. ISBN: 960-7425-11-1
- [10] Uniqueness of solutions of an elliptic singular boundary value problem, Kato, Shin, *Osaka J. Math.* 35 (1998), no. 2, 279–302.
- [11] Nonexistence of subsolutions of a nonlinear elliptic equation on bounded domains in a Riemannian manifold, Kato, Shin, *Hiroshima Math. J.* 28 (1998), no. 3, 419–435.
- [12] The scalar curvature equation on open Riemannian manifolds, Kato, Shin, *Sūgaku* 51 (1999), no. 3, 225–240.

- [13] General existence of minimal surfaces of genus zero with catenoidal ends and prescribed flux, Kato, Shin; Umehara, Masaaki; Yamada, Kotaro, *Comm. Anal. Geom.* 8 (2000), no. 1, 83–114.
- [14] General existence of minimal surfaces with prescribed flux II, Kato, Shin; Umehara, Masaaki; Yamada, Kotaro, World Scientific Publishing Co., Inc., River Edge, NJ, 1997, 116–135. ISBN: 981-02-3194-6
- [15] The scalar curvature equation on open Riemannian manifolds, Kato, Shin, *Sugaku Expositions* 14 (2001), no. 2, 219–236. [translation of *Sūgaku* 51 (1999), no. 3, 225–240]
- [16] On the weights of end-pairs in  $n$ -end catenoids of genus zero, Kato, Shin; Nomura, Kenji, *Osaka J. Math.* 41 (2004), no. 3, 507–532.
- [17] On the weights of end-pairs in  $n$ -end catenoids of genus zero II, Kato, Shin, *Kyushu J. Math.* 61 (2007), no. 2, 275–319.
- [18] Flux of simple ends of maximal surfaces in  $R^{2,1}$ , Imaizumi, Taishi; Kato, Shin, *Hokkaido Math. J.* 37 (2008), no. 3, 561–610.
- [19] Minimal surfaces of genus one with catenoidal ends, Kato, Shin; Muroya, Hisayoshi, *Osaka J. Math.* 49 (2012), no. 4, 931–992.
- [20] Minimal surfaces of genus one with catenoidal ends II, Kato, Shin; Muroya, Hisayoshi, *Osaka J. Math.* 52 (2015), no. 2, 307–371.
- [21] Index, nullity and flux of  $n$ -noids, Kato, Shin; Tatemichi, Kosuke, *Osaka J. Math.* 53 (2016), no. 1, 101–139.
- [22] Bicomplex extensions of zero mean curvature surfaces in  $R^{2,1}$  and  $R^{2,2}$ , Hashimoto, Kaname; Kato, Shin, *J. Geom. Phys.* 138 (2019), 223–240.
- [23] Nonorientable minimal surfaces with catenoidal ends, Hamada, Kohei; Kato, Shin, *Ann. Mat. Pura Appl.* (4) 200 (2021), no. 4, 1573–1603.
- [24] Regularity of ends of zero mean curvature surfaces in  $R^{2,1}$ , Ando, Naoya; Hamada, Kohei; Hashimoto, Kaname; Kato, Shin, *J. Math. Soc. Japan* 74 (2022), no. 4, 1295–1334.
- [25] Nonorientable minimal surfaces with various types of ends, Hamada, Kohei; Kato, Shin, World Scientific Publishing Co. Pte. Ltd., Hackensack, NJ, 2025, 1-16. ISBN: [9789811296703]; [9789811296710]; [9789811296727]
